Summary

Data Engineer with 4+ years of experience in BI and full-stack development, specializing in building automated data pipelines and scalable warehouse solutions.

Experience — 4 years, 1 month

Oracle Financial Services Software | Associate Consultant

June 2022 – Present

- Developed a stored procedure enabling serial COPY on Amazon Redshift for two sequential Airflow DAGs, eliminating recurring manual effort(100% reduction).
- Designed and implemented a generic pipeline to stage new data sources to the data warehouse eliminating a 2-week development and deployment cycle, reducing ingestion onboarding time by 99%
- Created a Python and Bash wrapper framework enabling automated sequential ingestion of large datasets through historical flat files.
- Built a Python utility with pandas to standardize raw files with varied schema, making the ingestion schema-agnostic while ensuring data consistency.
- Designed a module to extract large volumes from different cloud DWH clusters to on-premise storage and onto S3 buckets for downstream usage in Databricks. Reduced extraction time by 3.6x-5x while effectively recovering 2-4 hours of blocked workstation time per extract.
- Awarded Team Appreciation Award for Q4 2024.
- Finalist in "Ideathon" - AI/GenAI hackathon and an org-wide AI capability enhancement initiative.
- Awarded quarterly excellence recognition for Q2 2025 in the Americas region.
- Migration from legacy Java-based Netezza pipelines to Python and Shell script-based Amazon Redshift workloads through on-prem & cloud Airflow & S3
- Ongoing QA/Regression Testing & enablement of workloads migration from on-prem unix (RHEL) servers to cloud VMCs.
- Ongoing migration from Bitbucket-Jenkins-JFrog Artifactory & ServiceNow-based manual deployment to Github & Harness CI/CD.

Projects

Real-time streaming pipeline | Kafka, Python, Postgres, Tableau

GitHub repo

- End-to-end real-time streaming pipeline using Kafka written in Python & Postgres for visualization of stock market data in Tableau. Data sourced from Alpha Vantage API and running in a Docker container.

MedTrends | React, Databricks Workflows, MongoDB, AWS S3, Azure AI, PySpark

- Developing a multi-modal analysis platform for medical laboratory reports. Implementing Databricks Workflows and PySpark for data processing, with ongoing POC integration of Azure AI Document Intelligence and Microsoft Presidio for automated data extraction and PII anonymization.

Bitcoin Price Prediction | Python, ML

- Time-series price forecasting using ARIMA & LSTM.

DocDoc | React, Flask, MongoDB, AWS S3

- Allows users to organize their medical documents by category: bills, prescriptions, reports.

Travestor | Flask, REST APIs

- Suggests travel destinations based on parameters like ease of attaining visa, currency strength vs INR and weather.

RoadBuddy | Flask, REST APIs, CI/CD, Folium

- Calculates the least polluted route between two places.

Skills

Platforms: Unix-like (macOS, Linux), Windows

Languages: Python, PL/SQL, Java, Shell Scripting, JavaScript, HTML, CSS3

Technologies: Apache Airflow (Astronomer/MWAA), Amazon Redshift, AutoSys, AWS S3

Tools: Git, Jira, Bitbucket, GitHub, JFrog, Jenkins, Harness

Frameworks: Flask, Spring Boot, React

Other Skills: ETL, MDM, Data Modeling, Data Warehousing, Agile, SDLC, Stakeholder Management

Exposure to Azure Databricks, Informatica, Snowflake, dbt, Amazon MSK (Apache Kafka), EC2, MySQL, NoSQL(MongoDB, Cassandra), Apache Iceberg, Apache Spark (PySpark), Tableau, PowerBI

Certifications

Foundations of User Experience (UX) Design – Google (ID: ALVJV7GFBJW3)

Java (J2EE, J2SE, Java 11), Spring Boot, Microservices, Oracle RDBMS – Oracle

Oracle Cloud Infrastructure (OCI) 2023 & 2024 Foundations Associate – Oracle

BI Foundations with SQL, ETL & Data Warehousing – IBM

AI For Everyone – Deeplearning.ai | **GenAI For Everyone** – Deeplearning.ai

Mendix Low-Code Rapid Developer (No. 33878)

Education

Kalinga Institute of Industrial Technology | B.Tech in Information Technology (GPA 7.62/10) | 2017 – 2022

Loyola School, Jamshedpur | ISC(XII) 83.20% | ICSE(X) 89.17% | 2004 – 2017

Achievements & Awards

- Secured podiums in 50+ national and international quizzes, including the **Tata Crucible Business Quiz** (2019) and IIM Calcutta Intaglio Business Summit (2019).
- Winner at the COFAS International Computer Olympiad (IT Quiz & Game Design) and **TCS IT Wiz** (2016).

Co-curricular

- Principal's Award for outstanding contribution to the GK Club, Physics & Chemistry Club and Computer Club of Loyola School, Jamshedpur - through ideation & organization of events as the President, Event Manager & Treasurer respectively. (2015-17)
- Councillor - Senior Student Council of Loyola School, Jamshedpur. (2015-17)
